The Health Equity Advocacy (HEA) Strategy

A multi-year funding strategy with the goal of building a strong and diverse field of health equity advocates in the state of Colorado.

Field: An identifiable group of actors, in relationship with each other, that has a shared identity, knowledge base, vocabulary, policy, practices, leadership and sources of support

Health equity: Differences in health by race, income, geography or other social, economic or environmental factors are no longer observed, and people of color, low-income communities and other historically disenfranchised people are involved in achieving this outcome

Health equity advocacy field: A group of individuals and organizations who develop knowledge and practices that work in alignment to influence policy related to advancing health equity for Colorado's diverse populations

Why Field-Building?

Field-building

- Encourages efficiencies, maximizes resources and reduces silos
- New advocacy voices can be incorporated
- Harness power statewide to advance change

Health Equity Advocacy in Colorado

2013 Field Assessment

Research Questions

- 1. What is the current composition of the health equity advocacy field in Colorado?
- 2. How are these partners connected?
- 3. To what extent do those working on efforts to advance health equity see the emergence of a health equity advocacy field?
- 4. What are the perceived gaps in this field, as well as the opportunities for growth and development?

Methodology

Online Survey

- Survey open from March-April 2017
- Unbounded snowball sample
- Seeded by participants in the 2013 field assessment and 18 current organizations receiving funding from The Colorado Trust
- 557 organizations invited to complete survey
- 227 responses

Bellwether Interviews

- Telephone interviews
- 22 organizations presumed to be part of the health equity advocacy field
- Nominated by The Trust based on participation in the 2013 field assessment

Summary of Findings

- An emerging health equity advocacy field exists
 - Diverse and diffuse
- 2. Opportunities exist to leverage diverse expertise within the field
- There are some clear directions for future field-building efforts

To what extent would you agree that an identifiable health equity advocacy field exists in Colorado?

Limitations

New and complex field

Sample: Key stakeholders

Specific perspective

Who Comprises the HEA Field?

Sectors

Organization Type

Scope

Regions Served by Regional/Local Orgs

Communities Served

Most commonly served "core" populations

- Low-income families
- Children and youth
- Latino/Hispanic populations
- Rural populations

Least commonly served "core" populations

- African Americans
- Undocumented populations
- Native Americans
- Asian Pacific Islanders
- LGBT populations
- Homeless populations
- Incarcerated/formerly incarcerated populations
- Veterans

Top Issues
